

To answer the question, you will need four variables A, B, C and D which are sequentially the first, second, third and fourth pair of digits from the left in your student ID. For example, if your ID is **15101208**, then **A= 15, B= 10, C= 12 and D= 8.**

Now for the above figure, **RGB** colors at point A to H are sequentially given as following:

Vertex	Color (RGB)
A	(A, B, C)
B	(A, B, D)
C	(A, C, B)
D	(A, C, D)
E	(A, D, B)
F	(A, D, C)
G	(B, A, C)
H	(D, B, C)

Now find out the **HSV** color for the point P0 to P7 using Gouraud shading.

[Hint: You can first find RGB color for points P0 to P7 and then convert them]
